

Group ID Assignment Names of the Members are: 1. Odusola-Roscoe, Okoye Emmanuel 2. Adhikary Stephen Opeyemi 3. Fayomi Olufemi 4. Boomer Chrisogonus 5. Oyeleke Grace A dataset of Electronic sales from Sept 2023 to Sept 2024 data set was giving by Mr. Dada Dajo and we generate the following objectives to guide the analysis for the set of data as OBJECTIVES : 1. Basic Analysis : Which product has the highest unit price across all. Which customer ID has the highest rating. Which gender bought the most product. Which product has the highest quantity and which product. What is the average unit price for each product? 2. Profit and Pricing Analysis : What is the total profit generated for each product type. What payment method has the highest total price? 3. Time-Based Analysis : yearly trend. What is the total unit price in the year 2024. What is the highest total unit price in year 2023. 4. Identify the product with the highest use of standard, express, or overnight shipping. 4. Data Visualization : a. Create a line chart to visualize total price over time. b. Can you spot any seasonality in the total unit price? c. Showcase the top 5 product types purchased using charts. c. Create a stacked bar chart to visualize which product is the most purchased in the most shipping type.
